Fiber Pad Inc.

Fiber Pad Inc. is a plastic thermoforming company that specializes in custom heavy-gauge projects. Fiber Pad was founded by Grace Law, president and majority stockholder, in 1977 with her son Donald W. Law, CEO.

For 35 years Fiber Pad has served the manufacturing needs for a wide variety of industries, including aerospace and aviation, energy, industrial, marine, recreational, and transportation. The company operates out of two facilities that total 72,000 square feet and are on 12 acres of land.

Fiber Pad engages in lean manufacturing practices and recycles material scraps left over after production in an effort to preserve the environment.
